

DemMansay.com is following up on information coming out of Washington, DC that Congress is poised to pass a Resolution honoring ATF Agent William J Clarke. Clarke is the "*federalie*" charged in the shooting death of a Mahogany Run resident. Clarke, now living and working in Miami Florida after having his bail reduced 95% to a mere \$5,000 has a defense team that has been employing a slew of legal maneuvers to delay and have dismissed the case against Clarke.

Recon International Intelligence Agency (RIIA) got the word out of what was getting ready to take place in Congress. True to form, Delegate Christensen was flushed out, and hurriedly came forward to state that she was once again clueless and unaware of what was taking place in Congress. Just as, along with Governor John DeWolf, she was clueless and unaware that the initial Health Care reform package that was moving through the Congress didn't include the Virgin Islands and the other US colonies. It was only after we reported the exclusion did DeWolf and Delegate Christensen switch from promoting Health Care reform to lobbying for our inclusion. Kudos to RIIA, for being on top of this effort to insult the people of the USVI. Thumbs Down to Delegate Christensen for continuing to sleep behind the wheel in Washington, D.C.
