

# Sibilly Ballpark Paved with Feds' Mill

Take a drive past what's known as Sibilly Ballpark on St.Thomas, and you'll observe that the park looks more like a mini-carnival village. Edward "Baker" Phillips (seen below in the green T-Shirt) and his team did a real nice job converting the park into a mini-village where the DeWolf / Francis Wolverines could gather to "Revitalize" Bastille Day Celebration. The bulk of

the daytime activities are still taking place on Hull Bay Beach, during the day, but the Wolverines have commandeered the Bastille Day nightlife. Inquiring minds are wondering if the Wolverines are compensating the folks at Larry's Hideaway for lost income?

Nevertheless, the mini-village looks wonderful, thanks to the team's choice to cover the surface with "mill" taken from the federally-funded runway renovation project at Cyril E. King Airport.

Oops, did we just say “federally-funded”? We wonder if the “Federalies” granted permission for the “mill” to be removed and placed on private property. Then again, if the Governor is going to be at the mini-village, the placement of the “mill” is in fact a security enhancement. Can someone say “Mafoliegate”?

Speaking of “MafolieGate”, We received a tip that the Governor had received his tax return check, and promptly had the string that was securing the back gate at MafolieGate removed. We sent a roving reporter to investigate and lo and behold, the string has been replaced with a piece of chain. \$490,000 WELL SPENT!!!
